Medically Supervised Detoxification

Detoxification is a critical first step for individuals struggling with alcohol and drug addiction.

Our medically supervised
Withdrawal Management Services

ensure a safe and controlled withdrawal process, minimizing discomfort and managing potential health risks. This professional oversight improves treatment outcomes by stabilizing individuals physically and mentally, allowing them to focus on recovery. Detox saves lives and lays the foundation for long-term success.

What We Offer

Comprehensive Medical Support

Our licensed team provides around-the-clock care designed to ease withdrawal symptoms and protect your health.

Services include:

- 24/7 medical monitoring
- Physician and nurse practitioner oversight
- Physical assessments and vital sign monitoring
- Medication-assisted withdrawal management
- Telehealth provider visits
- Medication management and pharmacy coordination
- Nutritional support and hydration
- Emotional and behavioral support during detox

What to bring:

- Comfortable clothes for 3-5 days
- Shower shoes
- Basic toiletries that do not contain alcohol
- Current medication prescriptions in original packaging with legible labels
- Reading materials
- Cigarettes and nicotine replacement patches are allowed however we do not allow vaping or gum

Medically Assisted and Clinically managed residential withdrawal management, sometimes referred to as “social detoxification”, is an organized service that is delivered by appropriately trained staff.

Detoxification is provided under 24-hour supervision, observation, and support for clients who are intoxicated or experiencing withdrawal. Services provided under this level of care will include medical and nursing care.
